This paper presents the modeling, analysis, and design of fuzzy control to achieve optimization of a Battery management system for a Wind/ Solar hybrid system. According to the variation of the wind speed, solar isolation and the load demand, the fuzzy logic controller used to work effectively by turning on and off the batteries.

Logic. Fuzzy Logic is a logic or control system of an n-valued logic system which uses the degrees of state “degrees of truth” of the inputs and produces outputs which depend on the states of the inputs and rate of change of these states (rather than the usual “true or false” (1 or 0), Low or High Boolean logic (Binary) on which the modern computer is
