Understanding Oracle Business Activity Monitoring

Oracle BAM offers a Web Services API to update Oracle BAM data objects. This option is best for non-Java clients, or remote clients that can only access Oracle BAM Server over the Web, and does not offer guaranteed messaging.

Introduction to Oracle Business Activity Monitoring

This chapter describes how to start and stop Oracle Business Activity Monitoring (Oracle BAM) components, create users and groups, grant Oracle BAM application permissions using application-level roles, and set up data access permissions on data objects and folders, and reports. This chapter includes the following topics:

Managing Oracle Business Activity Monitoring

Oracle BAM uses Oracle Data Integrator to select the correct raw data and then transform and perform calculations required by the data designer. The transformed data is delivered to the Oracle BAM Active Data Cache in a ready-to-use state for fast access. Oracle BAM consists of several components:

Oracle Bam Guide | lines-art.com

Oracle BAM provides the following static untyped web service APIs: DataObjectOperationsByNameallows developers to interact with data objects by their display names. For example, Call Center performs Delete, Get, Insert, Update, or Upsert operations on rows in data objects migrated from BAM 11g within a BAM 12c server.

Using Oracle BAM Web Services

Oracle BAM supports drilling to details which allows the end user to see the lowest level of detail for the data which was used to calculate a particular element of the chart. The dashboard designer can choose which fields and in what order the user will see when they drill through to the low-level details.

Oracle Business Activity Monitoring

18 Using Commands with Oracle BAM This chapter describes how to use the BAMCommand command-line utility to export, import, migrate, clear, and delete BAM metadata, data, and project artifacts. It also describes how to use the loadgen utility to simulate a data stream. This chapter includes the following sections:

Using Commands with Oracle BAM

See Managing Oracle BAM Users for information about how to add users to roles and groups. Type a Name for the role or group you are adding. Select from the drop-down List: Application Role or Group. Click Search to populate the Available Members list. To add a member to the Selected Members list, select the member and click the single right arrow.

soa,osb,bam Enterprise deployment guide ... - Oracle Community

Introduction The Oracle BAM 12c command line utility - BAMCommand, supports the upgrade and migration of 11g artifacts into the 12c environment. The import operation with the -upgrade parameter is used to upgrade the Oracle BAM 11g artifacts (DO and EMS) metadata into Oracle BAM 12c. At the time of metadata upgrade, some information is modified.

11g to 12c Migration in Oracle BAM 12.1

I just wanted to know whether Oracle BAM can work on Windows XP. In the install guide they have mentioned XP can be used for demo purposes but their minimum requirements state they need Windows Server 2003 or 2000 as the platform.

Installing Oracle BAM on Windows XP | Oracle Community

Documentation for system administrators that describes how to administer Oracle Service-Oriented Architecture (SOA) composite applications consisting of binding components and Oracle BPEL process, human task, business rule, Oracle Mediator, and Oracle Business Process Management Notation (BPMN) service components in Oracle Enterprise Manager Fusion Middleware Control.
